

HANZA Mechanics Årjäng is one of the leading companies for machined precision parts in Sweden. Let us be your industrialization partner from prototype to full scale manufacturing and also support you with assembly and suitable logistic solutions as VMI and others. We support you with parts “ready for assembly” and take care of all operations including heat- and surface treatment as well as marking and others. Regardless of the size and nature of our mission the goal is long-term cooperation. HANZA Mechanics Årjäng is the excellence center for milling, grinding and EDM-technologies. The milling center in Årjäng is focused on 5-axis machines and can machine parts within a cube of 500 mm. In Årjäng we also have 5-axis grinding machines, Die Sink EDM, wire cut EDM and small hole EDM. We also have our own tool shop.
